Why Cyprus

Cyprus is situated at the crossroads of Europe, Africa and Asia. The excellent infrastructure, the strategic geographic location, the highly skilled human capital, the strong pro-business attitude and the comprehensive treaty network with all the major countries of the world, have established Cyprus as an ideal reputable International Financial Centre.

The accession of Cyprus to the EU resulted in the reformation of its tax system and its legislation in order to become EU and OECD compatible. Cyprus is not anymore a tax heaven but rather a tax incentive country. Cyprus' corporate tax rate is the lowest in the EU, the tax regime secures many exceptions and the island's more than 50 double taxation treaties remain in force and continue to provide ample opportunities for international tax planning whilst also minimizing legally overall taxes for business and individuals.

The recent tax reform has made Cyprus one of the most progressive international businesses, financial and commercial centres in Europe. European enlargement and the accession of Cyprus open up a new gate to investors. Cyprus is now firmly established as the ideal gateway for EU inbound and outbound investment. This supplements the traditional relationship which Cyprus had with Central and Eastern European countries as well as with Russia, Ukraine, China and India. The opportunities that will open up in the new environment will strengthen further the reputation of Cyprus as an ideal International Financial Centre.
